DETAILED ACTION

Response to Arguments

Applicant's arguments with respect to claims 5,7,10-13 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

Claims 5,7,11-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Rogers et al. See figure 2 which shows kernels of grains being treated including end products being removed after each of various separation steps.

Claim Rejections - 35 USC § 103

Claim 10 is rejected under 35 U.S.C. 103(a) as being unpatentable over Rogers et al in view of Giguere. Rogers et al discloses the basic process except for the oil recovery step. This results in wasted material. Giguere solves this problem by disclosing a similar process including a step of oil recovery. In order to recover even more materials from the process, it would have been obvious for one of ordinary skill in the art to modify Rogers et al by providing a germ oil recovery step, taught to be desirable by Giguere.
